

Invent and build your course

Once everything is made you can design your course and layout your putting hoops around you home, school or local park.

Use blue tac to put under the hoop tabs so they stand up.

Use this page to invent the layout of your course!

How to play

You can either play on your own or with friends and family. If you are playing with several people start at hoop 1 and take it in turns to putt the ball with your golf club through each hoop. Start with hoop 1 and finish with hoop 9. The first person to putt the ball through all the hoops wins!
