

# Shape Up!

Did you know there are many different designs and shapes of wind turbines?

Engineers and inventors are still trying to figure out the best way to capture energy from the wind. Here are some examples of shapes:

Now it's your turn to get designing! In the boxes below, draw and label your new shapes of turbine. Think about where it would be located and how it would move.

Inspired by a  
mode of transport

Inspired by  
human movement

Inspired by an  
animal or bird

Inspired by you!
